ABOUT US

ABOUT US

AN ORGANIZATION UNITING THE FORCES OF SPACE & SOCCER TO INSPIRE & UPLIFT COMMUNITIES ON EARTH.

[Space United](#) is an organization made up of space engineer-athletes that unites space & soccer to inspire communities around the world. What started in 2014 as [SpaceX's Football Club](#) has expanded to unite players across the space industry, and today includes our collaboration with Blue Origin's [Club for the Future](#). Our players in [Los Angeles](#) and [Seattle](#) are space professionals actively pushing the boundaries of space exploration at companies such as **SpaceX**, **Blue Origin**, **Relativity Space** and more. In 2020 our engineers connected with over 7,000 students around the world through our non-profit foundation, [Goal for Launch](#), and we are continuously growing our efforts to break down the barriers of traditional STEM outreach using soccer & space.

Our goals include inspiring youth to pursue careers in STEM, increasing diversity in the space industry and establishing a **professional soccer club** in the US by 2022.

SPACE UNITED FOOTBALL CLUB

A SOCCER CLUB WITH A STRONG MESSAGE THAT IS MAKING A POSITIVE IMPACT IN EDUCATION AND COMMUNITY

[Space United Football Club](#)® is an organization made up of space engineer-athletes that unites space & soccer to inspire communities around the world. Our players in [Los Angeles](#) and [Seattle](#) are space professionals actively pushing the boundaries of space exploration at companies such as **SpaceX**, **Blue Origin**, **Relativity Space** and more.

Our goals include inspiring youth to pursue careers in STEM, increase diversity in the space industry and finding the right partners and investors to establish a professional soccer club in the US by 2022.

GOAL FOR LAUNCH!

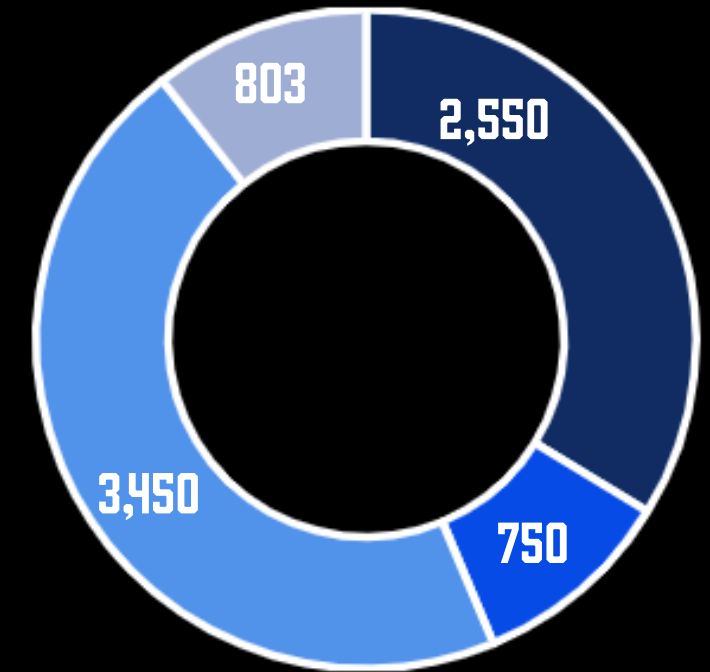

7,000+ STUDENTS REACHED IN 2020 WITH SPACE & SOCCER TALKS, BROADCASTS & PROGRAMS

[Goal for Launch!](#)® is our non-profit foundation focused on community outreach programs that uses the forces of **Space & Soccer** to inspire and support youth while increasing diversity in the STEM industry.

Our bilingual engineer-athletes help break down the barriers in traditional STEM outreach by:

- Making space accessible and relatable for all
- Supporting education for youth and minorities with role models working in STEM careers
- Complementing STEM with soccer to boost student engagement and well-being
- Providing Spanish language space exploration content
- Harnessing the global reach of football to expand space exploration across multiple continents and languages

STUDENTS REACHED VIA

POSTCARDS TO SPACE

HELPING MAKE SPACE ACCESSIBLE WITH CLUB FOR THE FUTURE & POSTCARDS TO SPACE

Space United® is also collaborating with **Blue Origin's Club for the Future** to help inspire youth to imagine careers in space and to help make space and STEM education accessible for all.

Students draw their vision of life & sports in space on a postcard and together with Club for the Future, we launch the postcards on Blue Origin's New Shepard rocket!

Postcards are then returned to students with a certified “flown to space” stamp.

SPACE UNITED ACADEMY

HIGH LEVEL COMPETITIVE SOCCER INSTRUCTION THAT
INTEGRATES STEM CONCEPTS ON THE FIELD

Space United Academy is our youth soccer program integrating STEM on the field to cultivate a strong connection with fundamental STEM concepts.

The academy will provide a pathway for players to develop and transition into our flagship teams.

MISSION CONTROL

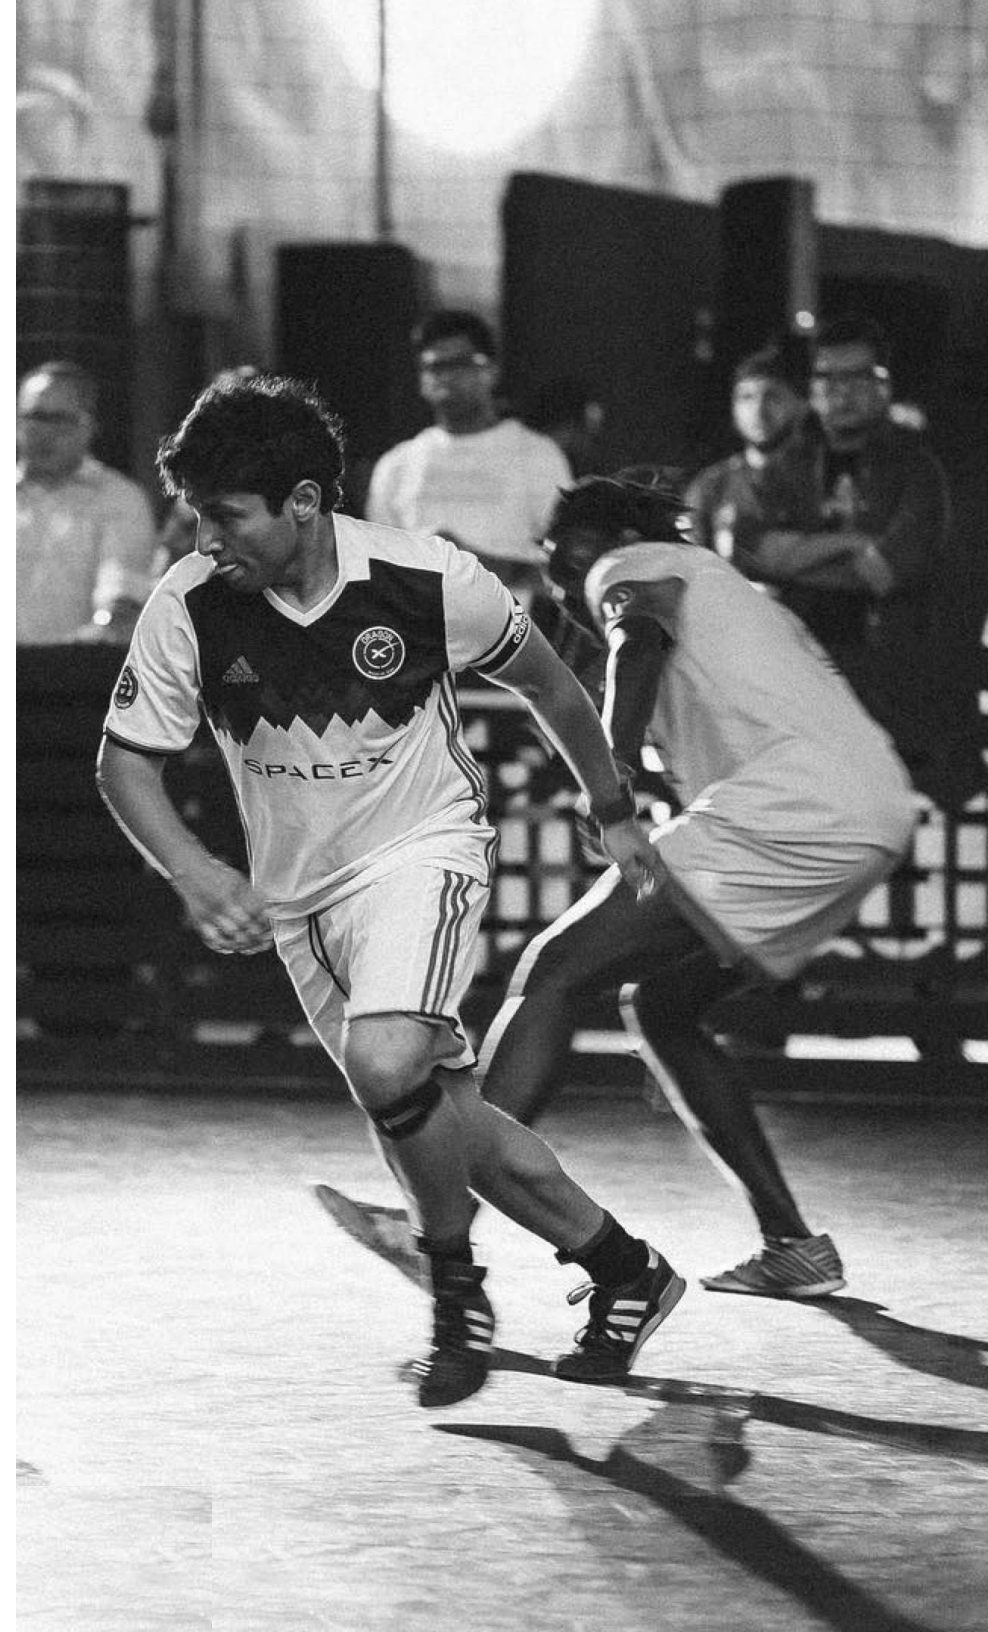

MISSION CONTROL

CAMILO TOBACIA, FOUNDER & CEO

Camilo Tobacia is the founder and CEO of Space United. He is a former youth soccer player for Millonarios FC, former engineer at SpaceX, and current engineer at Blue Origin. His unique life experiences inspired him to create an organization that unites soccer and academics and promotes a meaningful change in society...

OUR ORIGINS

ORIGINS

OUR TESTAMENT OF HOW STEM & SOCCER COMPLEMENT EACH OTHER TO CULTIVATE POSITIVE PURPOSE

Space United was inspired by the Tobacia family story. Camilo, the founder, grew up with humble means in **Colombia** where, like many other communities, there was a **lack of STEM resources**. Luckily for him and his 3 brothers, their father was an **indispensable role model** in their lives. Their father was a Mechanical Engineer and **sparked their curiosity in STEM**. In addition, **soccer complemented their education** and boosted their emotional health.

STEM & Soccer helped all 4 brothers grow up with positive purpose and become successful engineers.

ORIGINS

OUR TESTAMENT OF HOW SHARING ONE'S SUCCESS CAN POSITIVELY AFFECT EVERYONE AROUND THEM

Space United was also inspired by the message behind Camilo's father's story. His father grew up with poverty and adversity in his family life and felt hopeless until he realized that he could help his family through education.

He then worked hard to become a Mechanical Engineer and when he became successful, he was not only able to help his family, but also his community.

ORIGINS

WE ARE SPACE. WE ARE SOCCER. WHERE MINDS AND BODIES ARE ACTIVE AND FULL OF POSITIVE PURPOSE

In 2014 Camilo's life experiences inspired him to create **Space United** and use space and soccer to promote meaningful change in society.

At the very core of Space United's mission is the message behind Camilo's upbringing—one of sharing each other's success, because success that starts with one person can help and touch the lives of everyone around them.

MEDIA

FRESH OF THE PRESS

“I’m going to bet big that Space United will accomplish the things that they have set out to do. Any group of people that can figure out how to send rockets into space and are as passionate as they are, gets my backing to achieve whatever they have set out in front of them. ”

— Ben Hooper, Kicks To The Pitch

“Thank you so much for taking the time to talk to our students. It was such a wonderful and inspiring story that many of our children can relate to. The Space United story was so well received by our students that it definitely inspired many!”

-Mirman Head of School

They cheer together on the field and also on launch days, like SpaceX’s recent Starlink mission. And they recognize the weight of their work, and the example they can set with Space United.
